<b>COMMENTS:</b>	<p><b>Dr. Johanna Budwig</b> - was one of Germany's top biochemists as well one of the best cancer researchers throughout all of Europe. She was born in 1908 and lived to be 95. <b>Seven times she was nominated for the Nobel Prize.</b> <u>Dr. Budwig had over a 90% success rate with her diet and protocol with all kinds of cancer patients over a 50 year period</u> which is why The Budwig Center uses this as the basis of their program and we have been <u>directly authorized</u> by Dr. J Budwig to do so, when we visited her in August 2000.</p> <p><b>Does her protocol work for all types of cancer?</b> Dr. Budwig explained in her books that her healing plan works on improving the cells of the body. <u>It doesn't matter where the cancer cells are located or what name is given to your cancer</u> because the Budwig program addresses the basic cause of the cancer in the first place.</p>

<b>COMMENTS:</b>	<p><b><u>Fred Eichhorn</u></b> was diagnosed with terminal cancer in his twenties. By then, Fred earned a degree in Architecture. With that mindset, Fred insisted the doctors run tests to determine his chemical makeup. Based on the results Fred determined his deficiencies and their cause and made corrections. Fred’s doctors did not follow-up with Fred as they were certain he would only live a few months. Fred continued to get better, and enrolled in Medical School to become an organ transplant surgeon. The discovery Fred used to beat cancer, he now uses to treat patients that are scheduled to receive organ transplants. With Fred’s treatment, patients’ deficiencies are corrected and often no longer need a transplant. Fred also taught chemistry for three years, and has earned a degree in Nutrition. Once diagnosed with terminal pancreatic cancer in his 20’s, Fred is cancer–Free for over 28 years!</p>

<b>COMMENTS:</b>	The Budwig Center Protocol treatment combines the Budwig Diet and a personalized program based on the patient’s health assessment. No anti-cancer program would be complete without the high doses of pure enzyme metabolic protocol. According to the independent Cancer Research Foundation, the potent enzyme therapy cancer protocol has 93% cure rate for about 33,000 patients, most of whom were terminal!
